LOCKING SYSTEMS FOR INDUSTRY

# PRINTER LOCK

---

Introducing our easy to fit printer lock designed and manufactured in the UK to exacting standards. This lock can be fitted to printers to secure sensitive documents within, or can be used on doors or drawers as a deterrent to unauthorised entry.

Suitable for commercial, industrial or even domestic environments, this lock simply sticks to the outside surfaces of the drawer or door to provide instant security with no holes to drill.

Industrial grade adhesive pads, high grade materials and a Lowe & Fletcher lock assure an excellent level of security. To fit the lock, simply clean the surfaces with cleaning wipes supplied and use the adhesive pads to position the lock. It's ready to use.

A turn of the key releases the front section, allowing the door or drawer to open. Turn the key again if you need it to lock when it is next closed or remove the key if you want it to stay unlocked.

Security was never so simple.

**CONVENIENT AND VERSATILE SYSTEM**  
**NO HOLES TO DRILL**
