

Metal Office Furniture Locks

Lowe & Fletcher offers an extensive range of locking solutions for Metal Office Furniture. Our range is designed to meet the needs of Metal Office Furniture manufacturers from those seeking simple mechanisms for economy ranges to locking systems on designer office furniture.

We offer a variety of metal furniture locks for desks, filing cabinets, lateral filing cabinets and drawers and office storage solutions.

The range includes camlocks, pedestal locks, latchlocks, pin tumbler locks and multi-point locks. In addition we have a range of advanced mechanical and programmable electronic locks offering keyless solutions. We also design and make many customer specific locks.

If you are designing custom office furniture and would like advice on existing or bespoke lock options then please contact our team who will be happy to help you.

5. Pedestal Locks

6. Handles and Knobs

7. Camlocks

Metal Office Furniture Locks

1 Mechanical Combination Locks

Our range of mechanical combination locks have many different design features including key override and code finding functions. The common feature of such locks is that they eliminate the need for a key.

2 Electronic Locks

Designed to complement our traditional locking products, our range of electronic locks eliminates the need for keys and vastly reduces associated costs. With many different designs and features these adaptable locks are supplied with a choice of cams to suit almost every application. Our electronic locks can be programmed and managed remotely. They all come with key override as standard.

3 Multi-Drawer Locks

Multi-Drawer Locks are designed to lock multiple drawers by operating one lock. This works by use of a cast cam which projects axially from the base of the housing.

4 Push Locks

These locks have a locking bar that protrudes axially from the base of the housing when in the locked position and so are ideal for cupboards and cabinets with sliding doors.

5 Pedestal Locks

Locks that are designed for use on wooden pedestal furniture items such as desk drawer units

6 Handles and Knobs

Designed for use on cupboards, cabinets and doors, our range includes flush fitting handles, T Handles and Knob Locks.

7 Camlocks

This is the most versatile lock in the range, and is often used to secure doors, cabinets and cupboards.
