

A large range of cams are available. Cams can be straight, 45° cranked or 90° cranked. Cams can also be notched on either edge as required.

Cams can be fitted at 3, 6, 9 or 12 o'clock as shown. Please specify following details when ordering

1. For all cams:

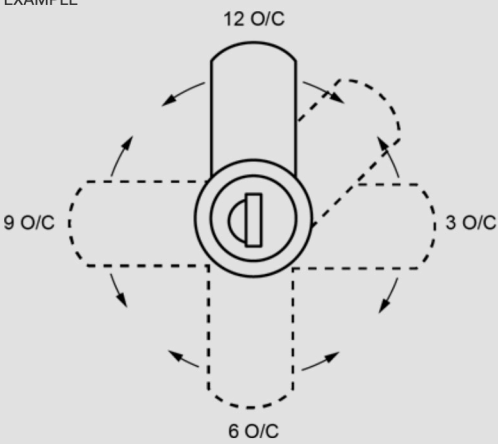

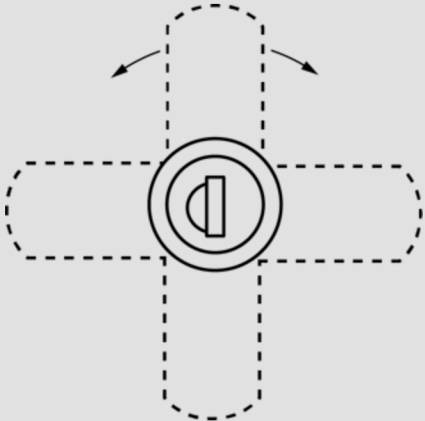

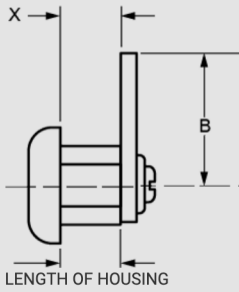

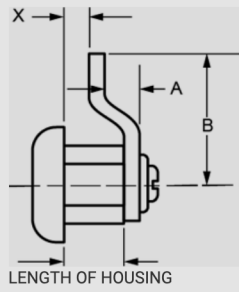

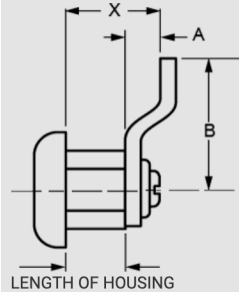

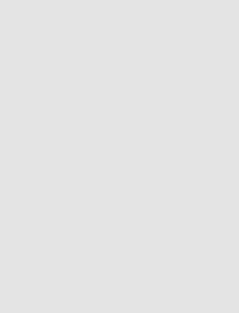

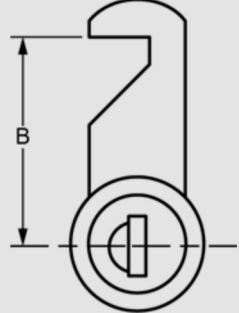

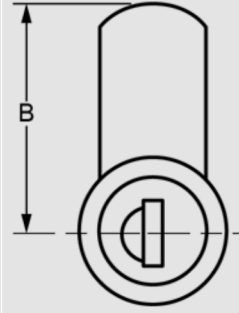

- Cam reference, if known.
- Cam position, when locked.
- Dimension B.

2. For cranked cams:

- Whether cranked towards head or away from head.
- Dimension A (alternatively please quote dimension X).

3. For notched cams when viewed from front of lock:

- If fitted at 6 or 12 o'clock specify whether notch is on Left or Right hand side.
- If fitted at 3 or 9 o'clock specify whether notch faces upwards or downward.
