

Keying Details

Keyed to pass: All locks have the same key number (Differ number), with one key opening all locks.

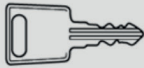

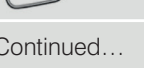

Keyed to differ: All locks have different key numbers (Differ number), each lock requiring its own key to open.

Note: Locks can also be supplied 'Keyed in sets to pass' - 'Each set to differ'. This arrangement caters for places such as offices, hotel rooms and hospital rooms where all units in a given room will operate one key number, but differ from adjoining rooms.

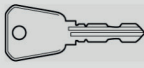

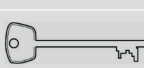

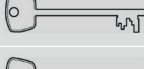

D.N.O.C.: (Differ Number On Cap) will result in the key number being stamped on the lock front (cap). This assists in obtaining replacement keys if they are lost.

Mastering: Key series can be mastered at extra cost.

Please see the list below highlighting the Key Series available, and their attributes.

Image	Series	Description	Discs	Levers	Pins	Entry	Combs.	Code Numbers
	FFE	5 Disc	4			Single	4	FFE 3, 8, 17, 31
